Notes:

1. The Department of Mathematics requires a C- or above for placement, whereas the university requires a C to meet mathematics competency.

2. A student can use a transfer course for credit in that course, but they cannot use it to place into the next course up through MAT 2010. They must take the MPE to place into a WSU course.

3. Students wanting to take RSP/ESP versions of math courses must contact the Center for Excellence and Equity in Mathematics for their procedures.

4. A student is only allowed 4 attempts to pass any course according to University regulations.

5. SAT scores will be changing in the near future due to SAT exam changes, so please consult with Testing, Evaluation & Research Services, if needed.
