Major: Honors Psychology

Activities at WSU: This is my fifth semester as a peer mentor for Bio1050/WIDER.

Research: I am a research assistant in Dr. Noa Ofen's Cognitive and Brain Development lab at the Institute of Gerontology, looking at memory formation and development.

Pets: Do siblings count? I have three.

Hobbies: Makeup, henna, listening to music, watching YouTube videos

Other interesting facts: I've lived in two countries, visited about seven; I'm hoping to at least double those numbers in the future! I'm in both departmental and university honors, and I'm always a busy bee. Otherwise, I'm not very interesting...
